

**symmetric**  
Exclusive Smart Timepieces

**The ultimate visual  
information device.**

*Connecting you with the elements of yachting.*

## **Versatile. In use and appearance.**

*Symetric* is a subtle information screen blending in with interiors and a portal where you can actively browse for more. Mounted on the wall, situated on a table or, when you feel like it, you can pick it up and take it with you.

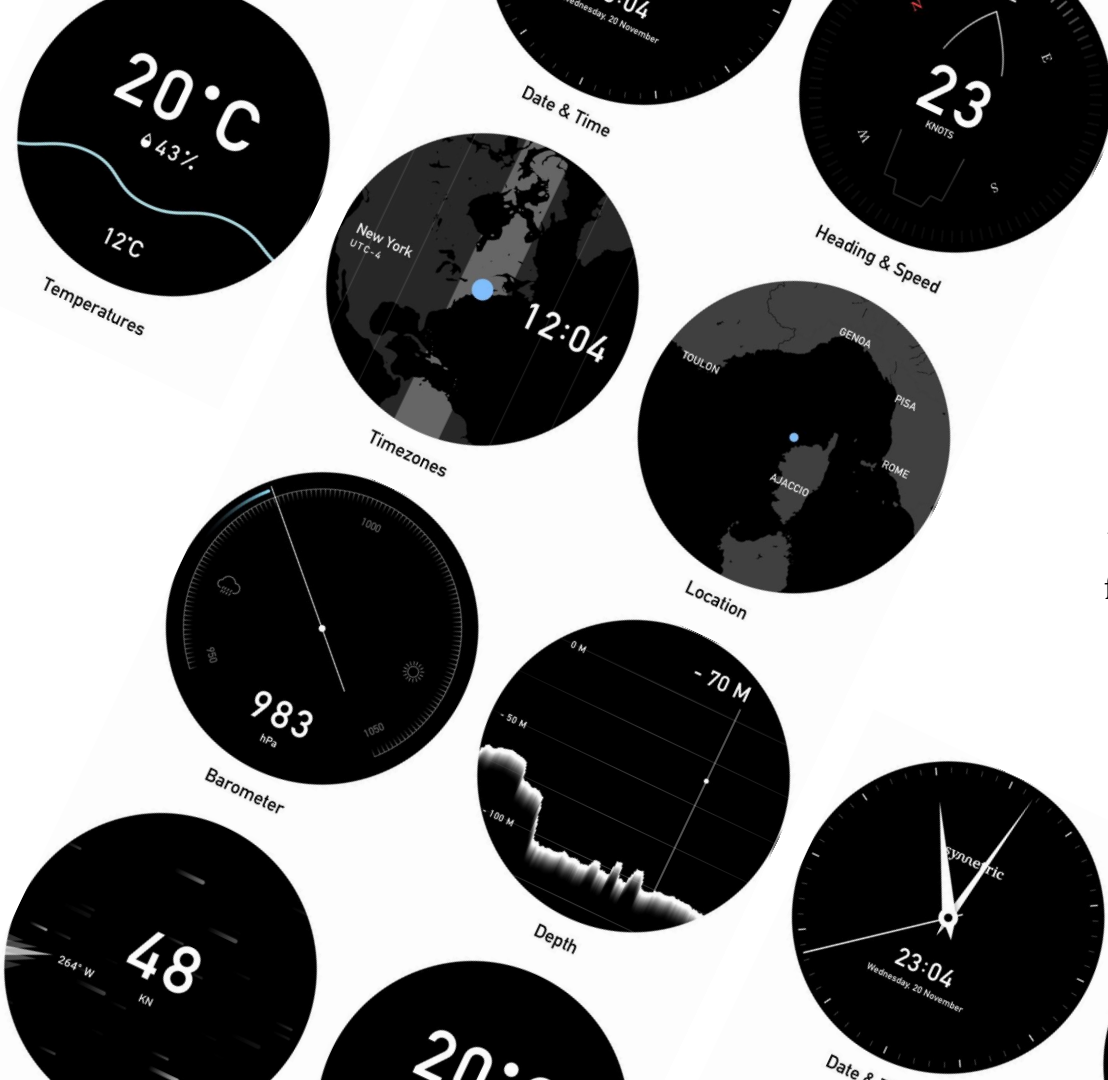

## **Visual information. For smart insights.**

Instantly get your information, clear,  
all in one device. Intuitively browse  
through the things you want to know  
or control.

**Clear design.  
Easy to read.**

Various internal and external sensors feed the data to each clearly designed interface page.

## Features.

Connected Symetric to a power source and be informed instantly. Connect the devices with the yacht's own NMEA data network and the internet and get virtually everything yachtsmen are dreaming of.

*Used in standalone mode, Symetric should be located having good GPS reception.*

\* Air quality is measured by IAQ from gas pressure

\*\* Requires yearly data subscription

\*\*\* May require separate hardware as Gest & Omnion

# Leather & Metal

The standard leather we use is Black and Dark Brown. Our team can source many other high-quality leather colours and finishes to ensure a seamless fit.

The metal parts come in a marine grade polished or matte look and can be plated with many finishes. Stainless Steel, Bronze, Gold, Copper or Nickel are just a few of the options.

## Freedom. WiFi and a battery.

For the ultimate and precise performance, the full color graphics on the 3.5" touch display are fed by data from local sensors on board. Symetric connects to it's NMEA collector via Wifi. This allows for a cable- and hassle-free installation.

When NMEA data is not available, Symetric can still show most features using its internal sensors. The battery allows you to take Symetric with you for a while and use it wherever you find it convenient.

*That's freedom.*
